Purpose of the Guide

This guide provides basic information that any investor needs to invest in the various governorates of the Republic. It relies on several sources to provide this information (e.g., Ministry of Investment (General Authority for Investment and Free Zones (GAFI)), Industrial Development Authority (IDA), Central Agency for Public Mobilization and Statistics (CAPMAS), Ministry of Supply and Internal Trade).

The guide contains three sections:

- 1. General information
- 2. Special information about the region
- 3. Detailed information about the governorates of the region

The guide has been categorized by region:

Map of Egypt and Its Four Regions

1 Urban Governorates

Cairo
Alexandria
Suez
Port Said

2 Lower Egypt Governorates

Damietta
Sharqeya
Dakahlia
Qalyubia
Kafir El-Sheikh
Gharbiya
Menoufia
Beheira
Ismailia

3 Upper Egypt Governorates

Giza
Bani Suef
Fayoum
Minya
Assiut
Sohag
Qena
Luxor
Aswan

4 Border Governorates

The Red Sea
New Valley
Matrouh
North Sinai
South Sinai

* The four regions are divided according to the Human Development Report, 2010.

Tariff for Processing the Waste of Industrial Establishments during FY 2022/2023 (EGP/m³)

Contaminants	Absorbed bio-oxygen (BoD)			Absorbed Chemical Oxygen (CoD)		
	More than 600 and less than 660	660 or more and less than 2000	2000 or more	more than 1100 and less than 2000	2000 or more and less than 5000	5000 or more
Concentrations (g/m ³)						
Cost of purification (EGP/m ³)	3	9	18	6	18	30

Electricity Tariff Applied during FY 2022/2023

Purpose of Use/Voltage	Cost of Capacity (EGP/kW Month)	Off-peak (Piaster/kWh)	Within Peak (Piaster/kWh)	Average Energy Price (Piaster/kWh)	How to apply
Super Voltage (220,132 kV)	40	96.9	145.4	105	The capacity is applied on the basis of the subscriber's maximum load every three months
High Voltage (66.33 kV)	50	101.5	152.3	110	The time of use tariff is applied according to the smart meters program, and the peak period is 4 hours, the start of which is determined by the Ministry of Electricity and Energy
Medium Voltage (22.11 kV)	60	106.2	159.2	115	
Low Voltage (380v)				125	In case of unavailability, the energy price will be applied

Tariffs for Electricity Consumption Segments Applied during FY 2022/2023

Purpose of Use/Voltage (kVM)	Cost of capacity (Piaster/kW-Month)	Off-peak (Piaster/kWh-Month)	Within Peak (Piaster/kWh-Month)	Average Energy Price (Piaster/kWh-Month)	How to apply
Segment 0 - 100			65.0		The capacity is applied on the basis of the subscriber's maximum load every three months
Segment 0 - 250			123.0		The time of use tariff is applied according to the smart meters program, and the peak period is 4 hours, the start of which is determined by the Ministry of Electricity and Energy
Segment 0 - 600			140.0		
Segment 601 - 1000			155.0		
Segment (from 0 to more than 1000 kVM)			160.0		In case of unavailability, the energy price will be applied

Prices of Petroleum Products during the Second Quarter of 2023

Commercial Butane	Diesel	Kerosene	Petrol 80	Petrol 92	Petrol 95
150 Pounds/cylinder	8.25	7.25	8.75	10.25	11.50
	Pounds/liter				
Fuel oil (Mazut) (With fixed prices for the food and electricity industries)				Automotive gas	
6000 Pounds/Ton				4.50 Pounds/m ³	

A decree regarding quarterly pricing equation of fuel and petroleum products

The committee formed by Prime Minister's decree no. 2764/ 2018, whose members are determined by the Minister of Petroleum and Mineral Resources' decree no. 505/ 2019, referred to above, shall undertake the following:

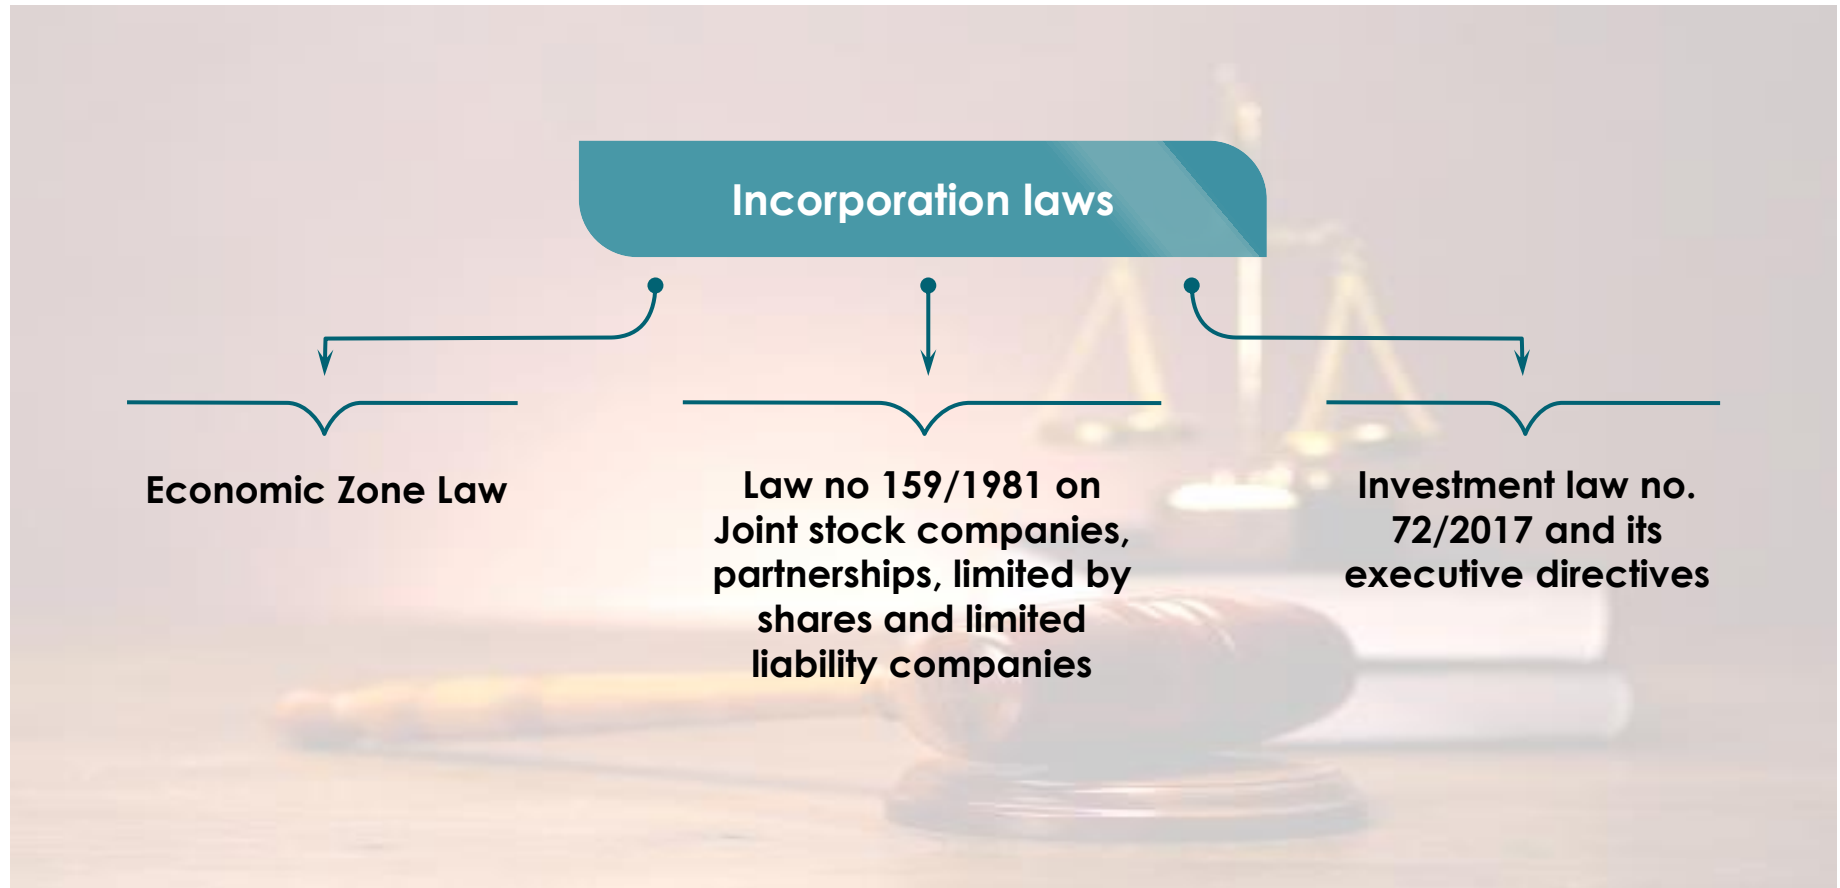

- Apply automatic pricing mechanism to petroleum products delivered to the consumer inclusive of value-added tax, with the exception of butane and petroleum products used by the electricity and bakery sectors, as of the end of June 2019, after reaching cost coverage. The selling price of these products in the local market will be reviewed as stated in Article 1 of this decree, provided that the percentage change in the consumer selling price, upwards or downwards, does not exceed (10%) of the selling price.

Exceptional Law (Golden License)

Prime minister decree no. 56/ 2022

The decree specifies the criteria and conditions upon which an investment project can be considered national or strategic as per article 20 of the investment law no. 72 / 2017

The **Higher Council for Investment has issued** new decrees expanding granting of the golden license. It is now being considered not to limit granting the license to companies establishing strategic or national projects, and amend articles nos. (40), (41) and (42) regulating the golden license to ensure that companies established prior to the promulgation of the investment law no. 72/ 2017 may be granted the Golden License.

4. Investment Incentives

* Investment Law no. 72/ 2017

Investment incentives: General incentives

All projects subject to the provisions of this law shall enjoy the general incentives mentioned in this chapter, with the exception of projects established under the free zones system. These incentives include:

- Establishment of companies and enterprises, contracts of credit facilities and related mortgages shall be exempted from the stamp tax, and authentication and notarization fees for a period of five years from the date of their registration in the commercial register.
- Land registration contracts necessary for the establishment of companies and enterprises are also exempted from the aforementioned tax and fees.
- Companies and enterprises subject to the provisions of this law shall be subject to the provisions of Article (4) of the customs law promulgated by law no. 186/1986 regarding the collection of a unified customs tax of two percent (2%) of the value of all imported machinery, equipment and devices necessary for the establishment thereof.
- This unified tariff also applies to all imports by companies and enterprises operating in public utility projects, such as machinery, equipment, and devices necessary for their construction or completion.
- Without prejudice to the provisions of the temporary release stipulated in the customs law promulgated by law no. 66/1963, investment projects of industrial nature subject to the provisions of this law may import molds and other production requirements of a similar nature without paying customs duties, for use for a temporary period in the manufacture of their products, and then re-exporting thereof.
- The release and re-export shall be according to the arrival documents, provided that the entry and reshipping documents are registered in records prepared for this purpose in the Authority, in coordination with the Ministry of Finance.

Investment incentives: Special incentives

Investment projects established after the enforcement of this law, in accordance with the investment map, shall be granted the investment incentive of a deduction from the net taxable profits as follows:

- 1. A 50% discount on the investment costs of sector (A)**, which includes the geographical areas most in need of development according to the investment map, and based on CAPMAS statistics, and according to the distribution of investment activities as indicated by the executive directives of this law.
- 2. A 30% discount on the investment costs of sector (B)**, which includes the rest of the Republic, according to the distribution of investment activities, for the following investment projects:
 - Labor-intensive projects in accordance with the criteria stipulated in the executive directives of this law
 - Medium and small enterprises
 - Enterprises that depend on or produce new and renewable energy
 - National and strategic projects determined by a decree of the Higher Council
 - Tourism projects specified by a decree of the Higher Council
 - Electricity production and distribution projects that are determined by a prime minister decree based on a joint proposal from the concerned minister, the minister concerned with electricity affairs, and the Minister of Finance.
 - Projects which exports their production
 - Automotive industry and its feeding industries
 - Wood industries, furniture, printing and packaging, and chemical industries
 - Manufacture of antibiotics, oncology drugs and cosmetics
 - Food industries, agricultural crops and agricultural waste recycling
 - Engineering, metallurgical, textile and leather industries

Investment incentives: Special incentives

- As per the provisions of the income tax law no. 91/2005, in all cases, the investment incentive shall not exceed 80% of the paid-up capital until the date of starting the activity.
- The deduction period shall not exceed seven years from the date of commencement of activity.
- The Prime Minister shall issue a decree upon a joint proposal by the concerned minister, the Minister of Finance and the minister with the relevant jurisdiction to determine the distribution of the sub-sectors of investment activities in the aforementioned sectors (A) and (B).
- The executive directives of this law shall clarify the concept of investment cost, the geographical scope of sectors (A) and (B), and the conditions and qualifying criteria for granting special incentives. The sub-investment activities included in the aforementioned Prime Minister decree shall be included therein immediately after its issuance.
- New activities may be added to enjoy special incentives by a decree of the Higher Council.

Conditions for obtaining special investment incentives

In order for investment projects to enjoy special incentives under this law, the following conditions must be met:

1. Establishment of a new company or facility to start the investment project.
2. The company or enterprise should be established within a maximum period of three years from the date of enforcement of the executive directives of this law. This period may be extended for one time by a decree of the Council of Ministers and based on the proposal of the concerned minister.
3. The company or enterprise shall maintain regular accounts; if the company or establishment operates in more than one region, it may benefit from the percentage determined for each region, provided that each region has separate accounts.
4. None of the shareholders, partners, or establishment owners have provided, contributed, or used any of the tangible assets of an existing company or enterprise in the establishment or incorporation of the investment project that benefits from the incentive at the time of the enforcement of the provisions of this law, or liquidated that company or enterprise within the period indicated in item (2) of this Article for the purpose of establishing a new investment project to benefit from the special incentives referred to. Violation of this shall result in the forfeiture of the aforementioned incentive and the company or enterprise shall be obliged to pay all tax dues.
5. Expansions of already existing investment projects may enjoy the incentives stipulated in Articles (11) and (13) of this law. Under this provision, expansions mean increasing the used capital by adding new assets that lead to an increase in the production capacity of the project, all in accordance with the rules and conditions determined by a decree of the Council of Ministers.

Investment incentives: Additional incentives

- Without prejudice to the incentives, privileges and exemptions stipulated in this chapter, and by a decree of the Council of Ministers, additional incentives may be granted to the projects stipulated in Article (11) of this law, as follows:
 1. Allowing the establishment of special customs outlets for the investment project's exports or imports, in agreement with the Minister of Finance.
 2. The state shall bear the cost incurred by the investor to connect the utilities to the real estate designated for the investment project or part thereof; after operating the project.
 3. The state shall bear part of the cost of technical training provided for workers.
 4. Refund half of the value of the land allocated for industrial projects in the event that production begins within two years from the date of handing over the land.
 5. Allocating land free of charge for some strategic activities in accordance with the controls prescribed by law in this regard.
- It is also permissible, by a decree of the Council of Ministers based on the proposal of the concerned minister, to introduce other non-tax incentives whenever the need arises.
- The executive directives shall indicate the rules for granting the additional incentives stipulated in this Article, as well as its qualifying criteria and conditions.

Conditions related to machinery and equipment

Equipment import

- Investment projects subject to the provisions of this law have the right to import on their own or through third party what they need for their establishment, expansion or operation, including raw materials, production requirements, machinery, spare parts, and means of transportation appropriate to the nature of their activity without the need to register them in the importers' registry.
- These projects are also entitled to export their products directly or through mediators without a license and without the need to be registered in the importers' registry.
- Investment projects that import and export in accordance with the provisions of this Article, whether on their own or through third parties, shall notify the Authority with a quarterly report on the quantities and types imported or exported, as the case may be.

Local equipment

- The link to local machinery and equipment production plants:

Source: Investment law no. 72/ 2017.

Special conditions for employing foreign labor

- Investment projects may employ foreign labor (maximum 10% of the total number of workers in the project, and this percentage may be increased to no more than 20% of the total number of workers in the project, in the event that it is not possible to employ national workers who have the necessary qualifications and in accordance with the conditions and rules set forth in the executive directives of this law.
- In some strategic projects of special importance that are determined by a decree of the Higher Council, an exception may be made from the aforementioned percentages, provided that the training of national manpower is taken into consideration.
- Foreign workers have the right to repatriate all or part of their financial dues.

Customs System

- The presidential decree no. 218/2022 amending customs tariff was issued. Below are some of the key amendments to the customs tariff according to the decree:

Item	Customs tariff
Specialized laboratory devices in the field of tissue culture, tumors, vaccine and blood research	5%
Human and veterinary vaccine related items	Exempted from customs tax
Miscellaneous materials (copper - tin - zinc)	Exempted instead of 2%
Electric cars	Exempted to promote clean energy
Machines for harvesting crops	2% instead of 5%
Equipping vehicle fueling stations with electricity or natural gas and components for converting vehicles to work with electricity only or with natural gas	2%
Clothes made of cotton or wool	Fall under the customs tariff 40%

You can view the tariff via the following link:

6. Trade Agreements

Trade Agreements

Egyptian policies seek to make Egypt a global and regional hub for services, production and re-export, which creates job opportunities and achieves economic growth by opening new markets for Egyptian products and at the same time attracts foreign direct investment from companies looking to benefit from Egypt's set of preferential trade agreements, highly competitive labor, utility costs, skilled labor and proximity to major global markets. Together, these advantages make Egypt an ideal center to export to Europe, the Arab world, the United States and Africa.

7. Defining the Different Types of Zones

Defining the Different Types of Zones

Zones are divided by governorates into several types, each of which has a definition, affiliation, and special conditions. and therefore projects that can be established differ in each of them.

1. Industrial Zones

2. Free Zones

3. Investment Zones

4. Economic Zones

5. Logistics Zones

1. Industrial zones

(Source: IDA.)

Zones that include specific plots of lands located inside or outside the control of the governorates, and the coordinates of their external borders are indicated on cadastral maps. They are allocated for industrial projects and service activities in accordance with the provisions of laws and decrees regulating the industry.

*Note: Industrial zones do not enjoy any special incentives other than the general incentives granted within the framework of the Investment law.

Defining the Different Types of Zones (cont.)

2. Free Zones

(Source: GAFI.)

2.1. Public Free Zone:

It is a zone subject to the sovereignty of the state and is located in most cases on one of the country's sea, land or air ports, and it is defined by walls to separate it from the rest of the state's territory. The public zone includes a group of investment projects that are established to take advantage of the incentives and advantages of investment in this zone, and the state provides the necessary infrastructure for carrying out activity within this zone.

2.2. Special Free Zone:

It is a single entity that represents one independent project (or more than one project in similar activities) as especially required. It must be located outside the scope of Public Free Zones according to the economics of the project and the nature of its activity that necessitates its presence in certain locations to capitalize on the advantages offered by this site in terms of proximity to sources of raw materials and production requirements, export markets, necessary labor, integration with nearby projects, or the need for proximity to a specific port or land road. The site of the special free zone is either owned or rented by the investor

Amendments to the executive directives of the investment law regarding special free zones

- The Council of Ministers may approve the establishment of special free zone projects, based on the proposal of the concerned minister, and after study and evaluation by the GAFI, in accordance with a number of conditions and criteria:
- The project shall take the form of a joint stock company or a limited liability company
- The proportion of the local content shall not be less than 30% within a maximum period of three years from the start of operation
- The percentage of exports shall not be less than 80%, and an exception may be made from this percentage in the case of strategic projects of special importance.
- The projects of free zones shall adhere to the conditions of industrial security, civil defense and firefighting, in accordance with the Egyptian code followed in this regard.
- The Authority shall monitor the activities of special free zone projects to ensure proper performance of their work and soundness of the procedures followed for carrying out such activities, in accordance with the mechanisms established by the Authority's board of directors and approved by the Council of Ministers.

Amendments also include:

The Council of Ministers may, based on a proposal of the concerned minister, and after study and evaluation by the Authority, approve the establishment of a special service free zone comprising a main service project for the establishment, development, management and provision of space for some subsidiary service projects that engage in similar activities, falling under any of the sectors mentioned in Article 1 of the directives, according to the special free zones system, and a number of conditions and criteria.

Advantages, guarantees and exemptions for free zones

Advantages, guarantees and exemptions:

1. Freedom to repatriate invested capital and project profits:
2. Freedom to choose the field of investment and the legal form of projects:
3. Freedom to set product prices and profit margins:
4. No minimum or maximum limits for the invested capital (for Public Free Zone projects only).
5. No limits on the nationality of the capital, as the foreign investor may be alone or contribute any percentage of the investment (with the exception of projects established in Sinai).
6. The possibility of operating on account of others to exploit the capacities of the project (according to the rules approved by the Authority in this regard).
7. Granting foreign investors residency facilities:
8. Granting foreign workers residence permits at the request of the project
9. It is not permissible to file a lawsuits against projects operating under the free zones system except after referring to the Authority
10. It is not permissible to nationalize or confiscate projects and establishments:
11. It is not permissible through administrative means to impose receivership on projects, seize or freeze their funds, or confiscate them by any means other than through the judicial route.

Advantages, guarantees and exemptions for free zones

12. Exempting all capital assets and production requirements necessary to carry out the project activity (except for passenger cars) from any customs duties, sales taxes or other taxes throughout the period of carrying on the activity, even if the nature of the activity required its presence temporarily outside the free zone.
13. Exempting the project's exports and imports from the applicable customs, taxes or fees.
14. The project and its profits are not subject to the tax law, customs laws, or legislation in force in the country throughout the period of practicing the activity.
15. The imports and exports of the project are not subject to any customs procedures or normal import rules that are in force in the country.
16. Exempting project imports from the local market from value-added taxes
17. Exempting transit goods with a specified destination from paying any fees on incoming and outgoing goods in accordance with the following conditions:
 - a. The project must be within the customs zone
 - b. The final destination should be specified in the bill of lading and invoice
18. Exempting all local components of goods produced by free zone projects from customs duties in case of selling to the local market

Defining the Different Types of Zones (cont.)

3. Investment Zones

(Source: GAFI.)

Investment zones are geographical zones with specific areas and borders that are designated for the establishment of one or more specialized investment activities and other complementary activities. A zone developer undertakes its promotion and development of its infrastructure.

The developer is every legal person licensed to establish, manage, develop or promote an investment zone.

Advantages, guarantees and exemptions:

1. Harmonization of investment activities in the one zone, which allows the investor competitive costs of operating and marketing economies as a result of industrial integration.
2. Exemption from stamp tax, notarization, and authentication fees for 5 years from the date of registration of projects in the commercial registry. Land registration contracts necessary for the establishment of companies and establishments are also exempted from said tax and fees.
3. Companies and establishments may not be nationalized or confiscated.
4. It is not permissible, by administrative means, to impose receivership on companies and establishments, seize or freeze their funds, or confiscate them.

Defining the Different Types of Zones (cont.)

5. It is not permissible for any administrative body to interfere in the pricing of the products of companies and establishments or in determining their profits.
6. It is not permissible for any administrative body to cancel or suspend the license to use the real estate that has been licensed for the use of all or part of the company or the establishment, except in the case of violation of the license conditions.
7. The board of directors of the investment zone is concerned with approving projects within it and issuing all necessary licenses for them in accordance with simplified procedures and nominal fees.

4. Economic Zones

(Source: GAFI.)

The North-West Suez Economic Zone is the first economic zone established in Egypt under law no. 83/2002 on economic zones of a special nature. The first objective of its establishment is to benefit from foreign investment, develop industries, and export to obtain foreign currency, as well as to develop new industries with advanced technology. It is an experimental zone for operating new projects, and establishing and improving the structure of the market economy in Egypt.

Defining the Different Types of Zones (cont.)

Incentives:

Companies operating in the Suez Canal Economic Zone have the right to:

- 1. 100% foreign ownership of companies
- 2. 100% foreign ownership of export and import activities
- 3. Exemption of imports from customs duties and sales tax
- 4. Customs duties on Egyptian imports imposed on imported components only and not on the final product
- 5. Express visa services

5. Logistics Zones

(Source: Ministry of Supply and Internal Trade.)

Logistics zones are integrated service zones that serve storage and other complementary activities to ensure the safety of products and their delivery to consumers with high quality. They include closed warehouses, open and equipped storage yards, cold stores (freezing), sorting and packaging activities, wholesale and semi-wholesale trade activities, and a center for sales outlets for neighboring factories.

Types of Logistics Zones:

1. External logistics zones	2. International logistics zones	3. Border logistics zones	4. Focal logistics zones	5. Regional logistics zones

Governorate Challenges

- Underutilized capacity in livestock and poultry projects.
- Limited tourism investments for developing coastal beaches, or public spending on developing archaeological sites.
- Low efficiency of some irrigation and drainage facilities (lifting stations - irrigation and drainage channels), poor distribution of irrigation water between the beginnings and ends of canals, and the lack of irrigation drainage systems in some land tracts.
- Limited use of training centers, weak structure of educational institutions, and their poor relationship with industry.

Governorate Challenges

Challenges =
Investment
Opportunities

- Excessive agricultural waste.
- Weak tourism activity in the governorate, despite the fact that it enjoys attractive sites for local tourism.
- Lack of industrial technical schools in some parts of the governorate (Tami Al-Amdid), as well as in some cities and rural areas.
- Shortage of trained workers.
- Weak investment in trade.

Governorate Challenges

Challenges =
Investment
Opportunities

- **The absence of a desert hinterland**
 - Absence of a desert hinterland for the governorate represents a major problem as this affects development in the governorate; and the population increase is a problem due to the lack of urban extension areas, which leads to encroachment onto agricultural lands.
 - The northern parts of the governorate are exposed to desertification or drought, which leads to the loss of the land's ability to produce agricultural products and support animal and human life.
- **Scarcity of energy**
 - The high costs of producing new and renewable energy represent a burden on urban development.
 - Efficient use of new energy and its renewable resources and good management play a very important role in facing the development challenge .
- **Human Development**
 - Aiming to attract skilled and trained workers as one of the main development drivers in the region.
 - Preparing and qualifying technical cadres and trained workers as one of the most important factors in human development.

Governorate Challenges

Challenges =
Investment
Opportunities

- Lack of space for horizontal agricultural investment.
- The presence of idle capacities in the investment projects operating in animal and poultry production, and the manufacture of fodder.
- Limited benefit from investment opportunities available in the tourism sector, despite abundance of touristic resources in the governorate, especially in the field of ecological and archaeological tourism.
- Lack of training and craftsmanship among large groups of youth in the Governorate.
- Failure to benefit from agricultural waste, which causes waste of resources.
- Lack of optimal utilization of mineral wealth resources (basalt - white sand - clay) in Shebin Al-Qanater and Al-Khanka.

Governorate Challenges

- Decline in fish production from natural fisheries and fish farms.
- Idle capacity in livestock and poultry projects.
- Slow industrialization, and limited exploitation of mineral wealth resources, or agricultural waste.
- Limited diversification in tourism, and the concentration of demand in recreational and religious tourism; seasonality of tourism activity; weak infrastructure of utilities, accommodation capacity and other tourism services; and limited tourism investments to upgrade coastal beaches or public spending to develop archaeological sites.
- Low efficiency of some irrigation and drainage facilities (lifting stations - irrigation and drainage channels), poor distribution of irrigation water between the beginnings and ends of canals, and the lack of irrigation drainage systems in some lands.
- Limited use of training centers, weak structure of educational institutions, and poor relationship with industry.

Governorate Challenges

- Lack of using agricultural waste.
- Damage to vegetables and fruits due to the lack of storage or storage refrigeration.
- Deficiency in purification of canals and drains, and increased pollution of the Nile water.
- Primitive means of production in most small factories and some medium factories.
- Unavailability of land for storage.
- Poor tourism service infrastructure in touristic areas.
- Poor means of tourism advertising and marketing.
- Absence of tourism programs linking touristic areas in the governorate with other governorates.
- Poor road network leading, to weak demand for tourist attractions.
- No tourist trails.
